TO MY FRIENDS:

To my friends and voters of Appomattox County

I hope you think as I do that Virginians will be faced with a far-reaching decision on July 11, 1961. In the forthcoming Democratic Primary, I am sure the three most able and conservative men, running as a team, are Albertis S. Harrison, Jr. for Governor, Mills E. Godwin, Jr. for Lieutenant Governor, and Robert Y. Button for Attorney General. All three have had many years of experience in public service and our State Government.

Virginia has a law, envied by many states, that gives everybody the right to work without being a member of any organization. There are, however, no laws restraining anyone from belonging to such an organization. I believe this was what God intended - every person should have the right to work if theywant to without union or government Telling them they must join and pay homage for the right to work in order to make a living for themselves and their loved ones.

Harrison, Godwin and Button thoroughly understand the urgency of giving our children an education necessary to meet present day responsibilities in teaching, science, business, mechanical or any other of life's occupations. They are dedicated to give every parent the right to send their children to public schools, ... or to exercise the right to ask for a tuition grant and send their children to a private school if they prefer.

Harrison, Godwin and Button are dedicated Virginians who are committed to keep our government clean and progressive. I hope you will make every effort to use your influence and vote to nominate these men on July 11.

I hope to see you, or some one working for the three above will see you soon. Come early to vote. If you know of anyone going to be away July 11th, please see me or one of the following before July 3rd: George Abbitt Jr., John C. Caldwell, Morton Ferguson, Watt Abbitt, C. W. Smith, Garland Plunkett, Walter Conner, Duval Conner or some one else who can help them apply for a mail ballot.

KNOW THE WEATHER

By E. H. Sims

In summer, what can you learn by noting the height of the early morning clouds?

The height of summer cumulus clouds gives you an important weather clue. In the coming summer months you might want to take advantage of this weather omen in making the day's plans.

If the morning's early clouds are low, that means there is a considerable amount of moisture in the air, because the day's updrafts or thermals are not rising very high before they turn into visible moisture droplets.

Chances of rain are better (from thundershowers) than if the clouds form at a great height, which will be an indication that there is not as much moisture in the air-since condensation is not taking place as quickly.

Appomattox is a growing town.
